Featured Product

PagePac® Plus Controller

This outstanding product is the result of years of experience with telephone operated paging systems. The **Controller** interfaces with any telephone system including Centrex. The attendant access input provides an override input port which may be required by health and safety. Built-in standard **Alert Tones** include Chime, Siren, Warble Siren, Night Bell, Fast Ring, Steady Tone and Door Bell. The system will also drive **Visual Signs** that may comply with ADA regulations for the hearing impaired, providing simultaneous messaging with date and time. The **Controller** is programmable by any touch tone telephone. The optional Software permits programming from your own PC.

Applications

The **PagePac® Plus Controller** is ideal for schools as it can provide bells, talkback to each classroom, emergency announcements, morning announcements, door access/control and visual silent messaging. Other ideal applications include airports, hospitals, prisons, retail stores, warehouses and manufacturing. Valcom Technical Support (800-782-5266) will help guide you through how to make the **PagePac® Controller** a vital part of your communication package.

Zone Selectable Options:
